

AMENDMENTS TO THE DRAWINGS

Please replace drawing sheet 1/10 with the attached Replacement Sheet. The Replacement Sheet is an amended version of the original sheet 1/10 that now includes the textual indication "FIG. 1" near the bottom of the sheet. Otherwise, the Replacement Sheet is essentially identical to the original sheet 1/10.

REMARKS

In the present amendment, Applicants address minor issues with the drawings and claims by including the attached Replacement Sheet and the claim amendments set forth above. The Replacement Sheet includes an indication that the illustrated figure represents "FIG. 1." Specifically, as noted above, the Replacement Sheet represents an amendment to original drawing sheet 1/10 to include the text "FIG. 1" near the bottom of the sheet. The present claim amendments merely clarify certain claim features and/or antecedent basis.

Interview Summary

In an interview conducted between the Applicants' representative (W. Allen Powell, Reg. # 56,743) and the Examiner (Eric Frank Winakur) on July 28, 2008, the Applicants' representative and the Examiner agreed that minor changes, such as those set forth by the amendments above, would be acceptable in an amendment submitted with or prior to payment of the issue fee. Accordingly, Applicants submit the present amendment under 37 C.F.R. 1.312.

Additionally, during the interview, the Examiner noted a discrepancy between the Application Data Sheet and the Declaration and Power of Attorney. Apparently, this discrepancy has become an issue with printing. Specifically, the Examiner noted that the Application Data Sheet indicates that Michael E. Fein is deceased, while the Declaration and Power of Attorney merely includes Mr. Fein's signature. The Examiner further noted that this was clearly the case because Mr. Fein passed away after the initial filing of the parent case and before the filing of the present continuation.

Apparently, to address printing issues, a request has been submitted to the Examiner to provide the name of the legal representative for Mr. Fein based on the Application Data Sheet. However, based on the Applicants best understanding, the issued patent should include Mr. Fein's name without a legal representative's name because all of the relevant documentation was actually signed by Mr. Fein. As suggested by the Examiner, the Application Data Sheet merely indicates that Mr. Fein is deceased because it was prepared at the time of filing the continuation. Accordingly, Applicants do not believe anything further

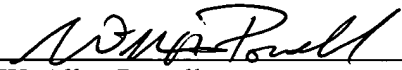

needs to be done. If the Examiner would like Applicants to provide additional documentation, such as a revised Application Data Sheet, Applicants will promptly respond to address the Examiner's concerns.

Conclusion

Applicants submit that no fee should be due in association with this response. However, if any fee is deemed necessary in association with this amendment and response, then the Applicants authorize the Commissioner to charge the requisite fee(s) to Deposit Account No. 06-1315 (TYHC:0053-2/FLE/POW).

Respectfully submitted,

Date: August 21, 2008
